Re: Construction Project on Ferndell Acres Drive

Dear Mr. and Mrs. Wiegert:

I was recently made aware of your construction project which is underway on Ferndell Acres Drive. You may not be aware that any land disturbing activity of one acre or more on the Oneida Nation Reservation is required to be covered under the Environmental Protection Agency (EPA) Construction Site General Permit. As this project is within the exterior boundaries of the Reservation, EPA is the permitting authority. I reviewed EPA's Notice of Intent (NOI) website and did not see an entry for your project. Coverage under this permit is to ensure that proper erosion control practices be implemented so as to prevent sediment and possibly other pollutants from leaving construction sites and negatively impacting surface or groundwater systems.

There is a website which provides the forms as well as permit information. The address for the website is: <http://cfpub.epa.gov/npdes/stormwater/cgp.cfm>

I can assist you with getting covered under the permit as well as choosing the appropriate erosion control measures, or you may contact EPA's stormwater coordinator Brian Bell directly at (312) 886-0981.

Please call me at 496-5333 if you have any questions. Thank you.

Sincerely,

Jim Snitgen, Water Resources Supervisor
